**\*\*\*Any questions please contact your school nurse\*\*\***

=====

*++ According to the Centers for Disease Control (CDC), since 2010 the flu has resulted in between 9.2-35.6 million illnesses, 140,000-710,000 hospitalizations and 12,000-56,000 deaths per year. The CDC recommends a yearly flu shot to reduce illness and severity of illness. A recent study showed more than 32 million missed school days and a 100 million missed work days with last year's flu season.*
